Partner:	Forensic Advantage® Systems
City:	City of Fort Worth, Texas
Technology:	Microsoft Windows 8.1 Microsoft Office 2013 Microsoft Office SharePoint Portal Server 2013 Microsoft SQL Server 2012 Microsoft Windows Server 2012

*"Forensic Advantage Systems provided a solution based on Microsoft technology that greatly improved the quality and efficiency of our laboratory's results."*

*Tom Stimpson, Lab Director, Fort Worth Police Department*

### The Challenge

The City of Fort Worth was looking to increase the efficiency, effectiveness and quality of scientific analysis for all evidence submitted to their crime lab and provide query and statistical reporting, with full inter-lab connectivity and collaboration to generate certificates of analysis for use in criminal cases.

### The Solution

The solution was developed by Forensic Advantage Systems to eliminate paper, increase throughput of cases and case backlogs in order to lower crime. Forensic Advantage was delivered to ensure accountability for the city of Fort Worth's case evidence collection and chain of custody, as well as case proceedings.

### The Impact

- Increases case throughput with faster access to results and reports
- Ensures evidence chain of custody for items analyzed
- Rapid collection and management of scientific analysis for evidence submitted
- Provides query and statistical reporting, facilitates inter-lab connectivity and collaboration
